## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

1. Group I: claims 1-7 and 25 drawn to a polypeptide, antigenic fragment, and pharmaceutical composition.
2. Group II: claims 8-20 and 26 drawn to an isolated nucleic acid, vector, host cell, and pharmaceutical composition.
3. Group III: claims 27-34 drawn to a method for inducing an immune response to a *P. ariasi* in a subject.
4. Group IV: claims 35-37 drawn to a method for inhibiting a symptom of a *Leishmania* infection or preventing a *Leishmaina* infection in a subject.

Sequence Election Requirement Applicable to Groups I, II, III, and IV.

In addition, Groups I, II, III, and IV, detailed above, read on patentably distinct sequences. Each sequence is patentably distinct because they are structurally different.

Applicant must further elect:

For Group I, choose a single amino acid sequence (SEQ ID NO.) of the *P. ariasi* polypeptide.

Art Unit: 1645

For Group II, choose a single isolated nucleic acid (SEQ ID NO.) encoding the polypeptide.

For Group III, choose a single amino acid sequence (SEQ ID NO.) of the *P. ariasi* polypeptide.

For Group IV, choose a single amino acid sequence (SEQ ID NO.) of the *P. ariasi* polypeptide.

**Applicant is advised that examination will be restricted to only the elected amino acid sequence and should not be construed as a species election.**

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is a purified salivary *P. ariasi* polypeptide. Group II are drawn to the second technical feature, an isolated nucleic acid, vector, host cell. Group III are drawn to a method of use of the first technical feature, a purified salivary *P. ariasi* polypeptide. Group IV are drawn to a method of use of the first technical feature, a purified salivary *P. ariasi* polypeptide. Group II-IV lacks unity with Group I because they do not have the same technical feature. For example, Groups I and Group II are drawn to amino acid sequences that are structurally different.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1645

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nina Archie whose telephone number is 571-272-9938. The examiner can normally be reached on M-F 8:30am-5pm.
